# DEEP SPACE

## Alpha MIPS

MIPS (Multi-directional Impact Protection System) is a world leading helmet safety system. In the event of an impact, the helmet technology provided by MIPS is intended to help reduce the impact of rotational energy on the head by enabling a relative movement between the head and helmet.

RECCO® Avalanche Rescue Technology makes you searchable to professional rescuers in the event of an avalanche accident\* or when lost in the outdoors. Wearing gear equipped with RECCO reflectors enables professional rescuers to locate you with RECCO detectors.

twiCEme is a technology aiming to make people safer by making the right safety information available at the right time. In the event of an accident, simply tap your smartphone and scan the twiCEme symbol on your equipment to access vital information such as medical profile, insurance information and coordinates.

\* RECCO reflectors do not substitute the tools necessary for companion rescue; avalanche transceivers, probe and shovel. They are a simple additional tool for everyone to always be searchable to professional rescuers.

Scan the twiCEme symbol with a smartphone to access vital information such as medical profile, insurance information and coordinates.

- Integrated twiCEme technology.
- Integrated RECCO reflector.
- MIPS (Multi-directional Impact Protection System)
- Hybrid construction for optimized weight and durability.
- 100% recycled EPS core.
- Foamfit - adaptive foam for individual fit.
- Primaloft liner for added warmth.
- Fidlock magnetic buckle.
- Adjustable ventilation.
- Size adjustment system.

Sizes: S-M (51-54), M-L (55-58), L-XL (59-62)  
 Weight: 565g (M)  
 Material: EPS core, PC main shell, ABS top shell  
 Certified: EN 1077-B
