SEE IT YOUR WAYE

There is a certain magic to sunglasses. They have a transformative power: the right pair can take a bad hair day and turn it into something great. They are also just plain practical, protecting your sensitive eyes from UV rays, dust, and whatever else the wind blows your way. Waye Vision make sunglasses for every occasion, situation and transformation. No matter face shape, no matter wallet. We got you covered!

Polarized lenses are designed to reduce glare from reflective surfaces, such as water, snow, or road surfaces. They contain a special filter that blocks intense reflected light and reduces glare, providing clearer and more comfortable vision.

Key features and benefits of polarized lenses:

Glare Reduction: Polarized lenses significantly reduce glare caused by sunlight reflecting off surfaces, making them especially useful for activities like driving, skiing, or spending time around water.

Improved Contrast: By eliminating glare, polarized lenses enhance contrast and visibility, allowing you to see details more clearly, especially in bright and reflective environments.

Better Eye Comfort: Polarized lenses reduce eye strain and fatigue caused by prolonged exposure to bright sunlight and glare, contributing to overall eye comfort.

UV Protection: Many polarized lenses also come with built-in UV protection, blocking harmful ultraviolet rays from the sun and helping to safeguard the eyes against potential damage.

Enhanced Clarity: The filtering effect of polarized lenses can enhance the clarity of your surroundings, providing a more enjoyable and visually comfortable experience.

Displays

The branded display reinforces brand identity, fosters customer trust, and ultimately boosts sales by providing a memorable and engaging in-store experience.

Adult

Kids

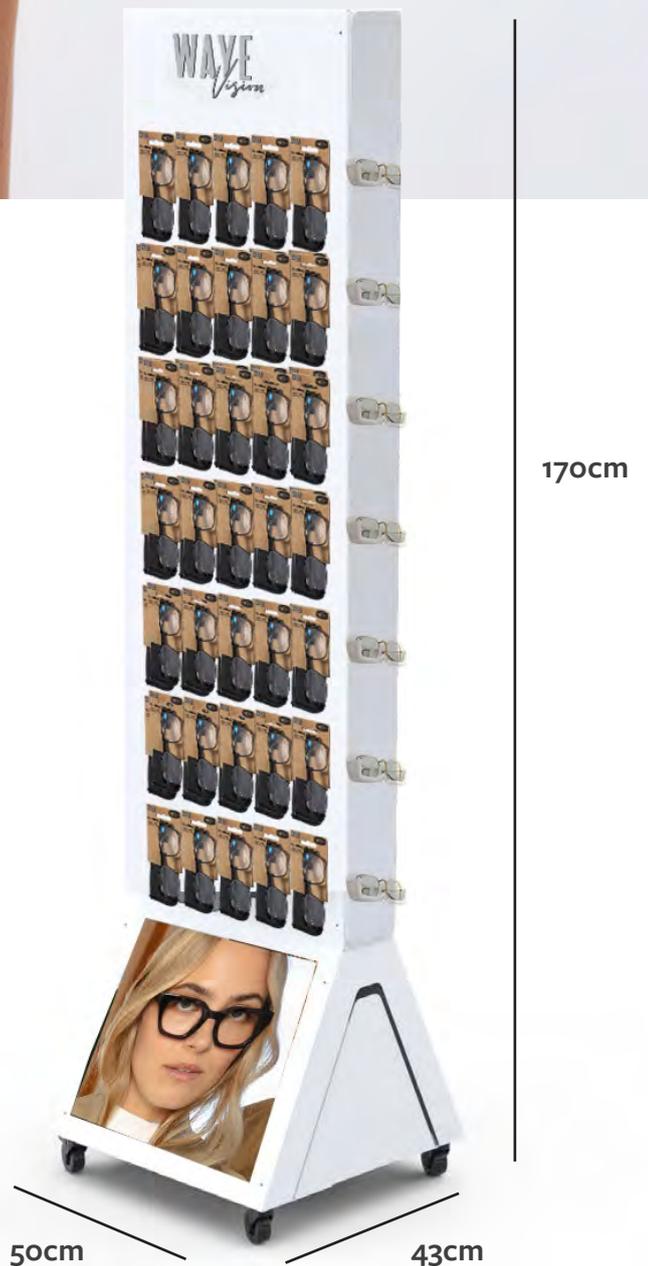

Reading glasses

Waye reading glasses are eyeglasses designed to enhance close-up vision for individuals experiencing presbyopia, a common age-related condition affecting near vision. They magnify and clarify text, making it easier for people to read books, newspapers, or any close-up materials.

Display

The branded display reinforces brand identity, fosters customer trust, and ultimately boosts sales by providing a memorable and engaging in-store experience.

Possibility to display sunglasses on one side and reading glasses on the other.

HOW TO CHOOSE THE CORRECT STRENGTH FOR YOUR READING GLASSES

Finding the right strength for your reading glasses is essential for optimal vision. Follow these steps to ensure you select the correct strength:

Know Your Reading Distance: Measure the distance between your eyes and the material you typically read. This distance will help determine the appropriate power for your reading glasses.

Test Your Vision: Use a reading chart or printed text with various font sizes. Start with a lower strength and gradually increase until the text becomes clear and easy to read.

Consider Your Age: As we age, the lenses of our eyes lose flexibility, resulting in presbyopia, a condition where near vision becomes blurry. Adjustments in reading strength may be necessary as you get older.

Try Different Styles: Reading glasses come in various styles, including full-rimmed, half-rimmed, and frameless. Choose a style that suits your face shape and personal preference while providing adequate magnification for reading.

Test for Comfort: Ensure the reading glasses fit comfortably on your face without pinching or causing pressure points. The lenses should align with your eyes, and the frames should rest securely on your nose and ears.

Consult an Optometrist: If you're unsure about your reading glasses strength or experience eye strain or headaches while reading, schedule an eye exam with an optometrist. They can assess your vision and recommend the appropriate strength for your reading glasses.

Remember to replace your reading glasses regularly, as changes in vision may occur over time. By following these steps and selecting the correct strength for your reading glasses, you can enjoy enhanced clarity and comfort while reading.

Complies with the requirements of the Regulation (EU) 2017/745 for medical devices (MDR) and the EN 14139:2010.
