tripoint®

# THE BEGINNING

Tripoint was founded on Sweden's West Coast, Göteborg in 2022 by Elina Lindberg and her colleague Jesper Englund. Together they have more than 30 years of experience from the eyewear fashion and sport industry. Mixing the world of fashion, sport and sustainability together. Creating sustainable products, produced with a sustainability mindset. Driven by curiosity, without boundaries.

# WHAT DOES TRIPPOINT STAND FOR

The name Tripoint is a geographical point at which the boundaries of three countries or subnational entities meet. This creates a unique place and binds countries together.

Tripoints can be found all over the world. There are approximately 176 international tripoints. We are humble and respectful to these surroundings. Knowing they can hit us with full force. That is why we adapt, that is why we prepare, that is why Tripoint exists. Made to withstand the harsh and variable climate and ready to take on every challenge.

# GLASSES WITH A MISSION

We want to make accessible innovative sports glasses that respect the environment and protect your eyes throughout every moment of your life.

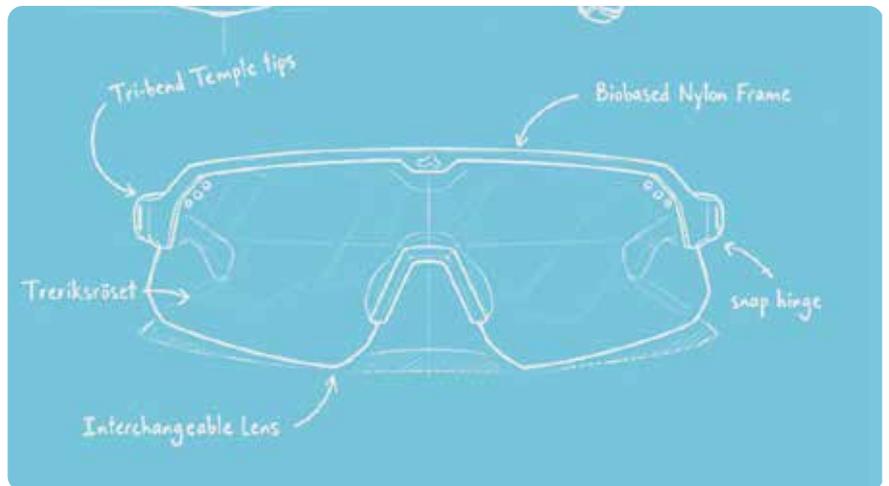

# EMPOWERING ATHLETES

Our journey began with a shared passion for design and an unwavering commitment to empower athletes in reaching their pinnacle of success. As a group of visionaries, we set out to merge style with substance, creating sports glasses that not only elevate your performance but also embody the essence of cutting-edge design.

Driven by the belief that athletes deserve more than just gear – they deserve an experience – we embarked on a mission to craft products that seamlessly blend functionality with flair. Our love for sports and the athletes who fuel our inspiration motivates us to push the boundaries of innovation, ensuring every pair of Tripoint sports glasses is a testament to our dedication.

But it's not just about the glasses; it's about the athletes who wear them. We're here to be more than just a brand; we're their dedicated partners in the pursuit of greatness. Our commitment extends beyond delivering top-notch products to providing an unparalleled level of service. Your goals are our goals, and together, we strive to conquer new heights.

## THE SYMBOL

The symbol represents a tripoint where three countries meet, shaped as a moving person within a sun-like circle that also evokes a mountain and sun rays bouncing off its surfaces.

# X-country

**Ebba Andersson** is one of the world's most powerful and consistent cross-country skiers. Her drive to constantly evolve and inspire others makes her an outstanding representative of our brand. We are honored to have Ebba as part of the Tripoint family.

# Alpine

**Sara Hector** is one of Sweden's most accomplished alpine skiers. With her Olympic gold, world-class technique, and relentless drive to push the limits, Sara represents the excellence and determination at the core of our brand.

# Biathlon

**Sebastian Samuelsson** is one of the world's most dynamic biathletes and a proud ambassador for Tripoint. Known for His passion for continuous improvement and his fearless approach to competition reflect the values at the heart of our brand.

# Cycling

**Fatima Berton** is one of Tripoint's standout ambassadors — an athlete driven by passion, discipline, and a love for the outdoors. Known for her dedication and strong presence in the endurance sports community, Fatima embodies the spirit of progress and authenticity that defines our brand

# Running

**Perrine Fage** embodies the spirit of progress that defines our brand. Whether training, competing, or motivating others through her journey, she reflects the authenticity and commitment at the core of Tripoint. We are proud to have Perrine as part of our ambassador family.

# Extreme

**Aaron Durogati** is a world-class paraglider & mountain athlete. Known for his fearless approach to flight, technical mastery, and deep connection to the mountains, Aaron embodies the spirit of adventure and precision that defines our brand.

 TRI-X Polarized 

 TRI-X UltraVue Cat. 2 

 TRI-X UltraVue Cat. 1 

 TRI-X Chromic 

## TRI-X VISION

# LENS BOOST TECHNOLOGY

When the surroundings and the weather conditions are harsh and unpredictable.  
Or you want a lens that is perfectly adapted to your purpose.  
The Tri-X Vision lens technologies are here to help.

**UltraVue**  
HIGH CONTRAST LENS

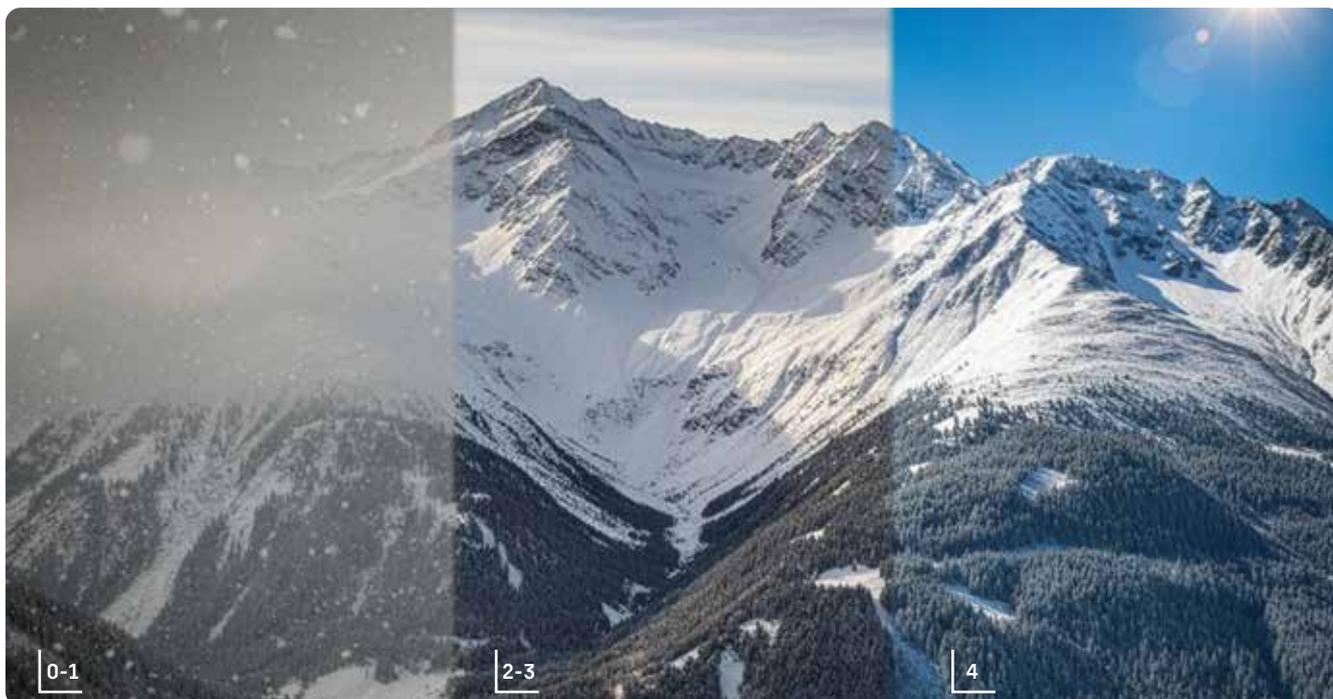

The Tri-X UltraVue lens is designed to enhance colors and contrast in low-light conditions. It blocks all fuzzy colors in the spectrum, resulting in sharp, clear vision even in low light.

**Chromic**  
LIGHT-ADAPTIVE  
CAT.0 ☁️ - CAT.3 ☀️

The Tri-X Chromic lens is designed to adapt to all weather conditions. It automatically and instantly adjusts its tint from light to dark and back again based on the weather.

**Polarized**  
ANTI-GLARE

The Tri-X polarized lens eliminates all reflected light rays, reducing glare from water, snow, wet roads, and other reflective surfaces.

#### CATEGORY 0–1

Very High Light Transmission

VLT approx. 43–80% [Cat. 1] and above 80% [Cat. 0]

##### BEST FOR:

Fog and flat light  
Snowstorms / “whiteout”  
Evening or night skiing

#### Category 2–3

Medium to Strong Light

VLT approx. 18–43% [Cat. 2] and 8–18% [Cat. 3]

##### BEST FOR:

Sunny to partly cloudy weather  
Common light conditions  
Everyday skiing and racing

#### Category 4

Extremely Strong Light

VLT approx. 3–8%

##### BEST FOR:

Very bright sunlight  
High-altitude and glacier skiing  
Days with intense light and strong snow reflection

#### Lens categories

Lens **categories 0 and 1** are light lenses that let in a lot of light and are used in fog, snowfall, and flat light.

**Category 2 and 3** are the most versatile, suitable for sunny to

variable conditions, reducing glare while maintaining clarity. **Category 4** is the darkest lens, designed for extremely bright sunlight, especially on glaciers or at high altitude.

#### Tri-X Vision

The **Tri-X UltraVue** lens is designed to enhance colors and contrast in low-light conditions. It blocks all fuzzy colors in the spectrum, resulting in sharp, clear vision even in low light.

The **Tri-X Chromic** lens is designed to adapt to all weather conditions. It automatically and instantly adjusts its tint from light to dark and back again based on the weather.

The **Tri-X polarized** lens eliminates all reflected light rays, reducing glare from water, snow, wet roads, and other reflective surfaces.

Our **Tri-X nylon** lenses are made from 45% organic polyamide derived from castor oil, chosen for their crystal-clear vision, lightweight feel, flexibility, and impact-resistant properties.

# WHY TRIPPOINT SPORTS GLASSES?

**Biobased nylon frame:** Tripoint Sports Glasses are meticulously engineered and crafted using top-tier bio-based materials, ensuring durability in the face of challenging conditions, lasting for seasons of intense sports activities.

**Optimal Visibility:** These sports glasses deliver unparalleled visibility, thanks to cutting-edge lens technology that enhances clarity and minimizes glare with 100% UV-protection. Whether you're cycling, skiing, or participating in outdoor adventures, Tripoint Sports Glasses offer crystal-clear vision.

**Customized Comfort:** Tailored for comfort, Tripoint Sports Glasses are often adjustable in both nose (Tri-click nose system™) and temples (Tri-bend temple tips™) to securely fit any face shape. Their ergonomic design minimizes pressure points, allowing you to concentrate on your athletic pursuits without distraction.

**Lightweight Design:** Recognizing the need for agility in sports, Tripoint Sports Glasses boast a lightweight design. Say goodbye to the burden of heavy eyewear, empowering you to navigate challenging terrain effortlessly and focus on your athletic pursuits with unmatched ease.

**Trusted by world-class athletes:** Join the ranks of elite competitors who choose Tripoint for precision, durability, and unrivaled performance. When the best athletes in the world trust Tripoint, you know you're in good company.

#### 100% UV400 Protection

Our lenses block all harmful UVA, UVB & UVC light rays with wavelengths up to 400 nanometers – regardless of sun or cloud conditions.

#### Biobased Nylon Frame

The frame is made of 45% organic sourced polyamide with castor oil. The nylon material is both strong and light weighted. The Frame puts minimal strain on the nose, ears and environment at the same time.

#### Biobased Nylon lens

The Biobased Nylon lens is both lighter and provides a clearer view than Polycarbonate, which is the most common material for lenses in sports glasses. The lens is flexible, resistant and has a good "memory". If you bump or bend them, they will return to their original shape. Nylon as a material is also free from BPA which is a chemically harmful substance for the body.

#### Soft pouch

pouch designed to keep your shades safe. Also works as cleaning wipe to keep the dirt away, for permanent visual comfort.

#### Hydrophobic + Oleophobic

Our top of the line Hydrophobic + Oleophobic treatment ensures water, oil and dirt pearl off your lenses.

#### Interchangeable lens

The weather conditions can suddenly change, then it might be handy to have a spare lens ready. On this frame, you can easily change from one lens to a lens that is best suited for the moment. Spare lenses are available for purchase.

#### Optical insert

RX-able optical insert which can be taken to an optician and fitted with your own prescription lenses.

#### Polycarbonate lens

The lens in Polycarbonate has high impact resistance and a good optical quality for clear and crisp vision.

#### Snap hinge

High quality click hinge for a long-lasting temple. Free from squeaking sound, loose screws and unexpected folding.

#### Tri-bend temple tips

The rubberized temple tips are adaptable and easy to adjust to your head for a stable and comfortable use for extended periods.

#### Tri-click nose System

The unique system makes the nose part easy to adjust and maintains the shape that the user himself specified. The nose part is rubber-coated and provides the user with comfort during longer and tougher forms of activity.

#### Tri-dot ventilation

The right amount of air ventilation can be important to keep the fog away. Our tri-dots provide the user with enough air circulation for a fog-free experience.

#### Tri-field wrap-around

The wrap-around frame provides a wide field of vision and enhanced peripheral eyesight to ensure optimal visual accuracy and improve your sports performance.

#### Adjustable nose pad

This unique system allows for easy adjustment of the nose piece at any angle specified by the user. The nose piece is rubber-coated, providing comfort during extended and more strenuous activities.

#### Switchbar System

The innovative switchbar system lets you easily convert your eyewear from full-frame to half-frame. Simply remove the lower part of the frame and replace it with a nose piece to suit your activity or style. This flexible design offers two looks in one pair-maximum coverage when you need it, and a lighter, more open feel when you don't.

#### Friction rubber nose piece & temple tips

The rubberized nose piece & temple tips are gentle and soft to your skin for a stable and comfortable use for extended periods.

#### Removable side shields & nose part

Detachable accessories designed to provide additional protection in extreme environments, such as high-altitude or snowy conditions.

#### Tri-X Polarized

The Tri-x polarized lens cuts out all reflecting light rays. No more glare from water, snow, wet roads or other reflecting materials.

# 001 Treriksröset

Treriksröset is the ideal model for speed sports such as mountain biking, road biking or skiing. But still just as stylish to be able to fit on a catwalk. A sober and pure design, combining style and technicality: Its wrap-around lens offers optimal protection against the wind generated by speed, but also against branches that you may encounter on your way.

Enjoy increased peripheral vision and clarity with the biobased Nylon lens, an essential factor in improving your visual accuracy and therefore, your sporting performance! Its 100% UV protective lens will counteract tired eyes for many years to come.

# WHY TRIPPOINT SKI GOGGLES

**Quality:** Tripoint Goggles are engineered with precision and crafted using high-quality materials, ensuring they can withstand the toughest conditions and last for seasons.

**Visibility:** These goggles offer unparalleled visibility, thanks to advanced lens technology that enhances clarity and reduces glare. Whether you're skiing, snowboarding, or engaging in other outdoor activities, Tripoint Goggles provide crystal-clear vision.

**Comfortable Fit:** Designed for comfort, Tripoint Goggles are adjustable to fit any face shape securely. Their ergonomic design minimizes pressure points, allowing you to focus on your adventure, not your eyewear.

**Protection:** Tripoint Goggles prioritize your safety. They offer excellent UV protection to shield your eyes from harmful sun rays and are built to withstand impacts, offering essential protection in high-risk sports.

**Trusted by world-class athletes:** Join the ranks of elite competitors who choose Tripoint for precision, durability, and unrivaled performance. When the best athletes in the world trust Tripoint, you know you're in good company.

**Stylish Designs:** With a range of stylish and trendy designs, Tripoint Goggles not only perform exceptionally but also make a fashion statement on the slopes or trails.

**Versatility:** Tripoint Goggles are versatile, suitable for various outdoor activities such as skiing, snowboarding, hiking, and more. They're an all-in-one solution for your eye protection needs.

#### Double lens

A double lens delivers crystal-clear vision with anti-fog performance, keeping your view sharp and protected in every condition.

#### Built in anti-fog shield

The built-in anti-fog shield on double lens ski goggles prevents fogging, ensuring clear vision and optimal performance in all conditions.

#### Double buckle size adjustment

The double buckle size adjustment allows for a customizable, secure fit, ensuring comfort and stability during wear.

#### 3-layer foam

The 3-layer foam provides enhanced comfort and a secure fit, effectively cushioning the face and improving moisture control.

#### Goggle sock protection

A soft, protective cover that shields your lens from scratches and dust, keeping your goggles fresh and clear.

#### Magnetic lens

Quick-swap technology that lets you change lenses in seconds for perfect vision in any condition.

#### Airblocker

If you're about to go in high speeds, this is an air blocker that blocks air flow around the entire frame. Perfect for Giant Slalom, Downhill, Super-G.

#### Extra contrast lens included

An extra contrast lens is included, enhancing visibility and clarity in varying light conditions for a better experience on the slopes.

#### Cylindrical lens

A cylindrical goggle lens curves horizontally while remaining flat vertically, offering a wide field of view with a classic look and minimal glare.

#### Toric lens

Our lenses block all harmful UVA, UVB & UVC light. A toric goggle lens combines wide vision, reduced distortion, and a snug fit, enhancing clarity and comfort for skiing and snowboarding.

#### Spherical lens

A spherical goggle lens curves both horizontally and vertically, reducing distortion and enhancing peripheral vision for a clear, wide view.

#### Silicone strap

A silicone strap ensures a secure, non-slip fit that stays comfortable and reliable in all conditions.

#### Interchangeable lens

The weather conditions can suddenly change, then it might be handy to have a spare lens ready. On this frame, you can easily change from one lens to a lens that is best suited for the moment. Spare lenses are available for purchase.

#### Tri-X Polarized

The Tri-x polarized lens cuts out all reflecting light rays. No more glare from water, snow, wet roads or other reflecting materials.

#### 100% UV400 Protection

Our lenses block all harmful UVA, UVB & UVC light rays with wavelengths up to 400 nanometers – regardless of sun or cloud conditions.

## 102 Nafkopf

Our 102 Nafkopf snow goggle is developed from several years of hands-on experience within the Alpine World Cup circuit. Nothing is left to chance—every millimeter of the frame has been carefully evaluated to give athletes the absolute best conditions for success on the mountain. With its wide cylindrical lens and precision-engineered frame, you get an extraordinary field of vision that enhances confidence and performance in every turn.

For athletes pushing into extreme speeds, the 102 Nafkopf can be equipped with an Airblocker, a detachable airflow blocker designed to eliminate unwanted wind around the entire frame. This makes it the perfect choice for Giant Slalom, Downhill, and Super-G. Even though it's engineered with professional racers in mind, it naturally works just as well for dedicated enthusiasts looking for top-tier performance and protection.

### Technical features

# WHY TRIPPOINT ● ● ● SKI HELMETS

Selecting a Tripoint Ski Helmet isn't just a choice; it's a commitment to your safety, comfort, and performance on the slopes. Here's why choosing a Tripoint Ski Helmet is a wise decision:

**Safety First:** Tripoint Ski Helmets are engineered with cutting-edge technology to provide maximum protection. They meet or exceed safety standards, ensuring your head is safeguarded in the event of a fall or collision. Your well-being is our top priority.

**Comfortable Fit:** Tripoint Ski Helmets are designed for a snug, comfortable fit. They come with adjustable straps and sizing options to ensure your helmet fits securely, eliminating distractions while you conquer the mountain.

**Ventilation:** Tripoint Helmets feature advanced ventilation systems to regulate temperature and prevent overheating. Stay cool and focused during intense runs while maintaining optimal warmth in colder conditions.

**Durability:** Crafted from high-quality materials, Tripoint Ski Helmets are built to withstand the rigors of skiing and snowboarding. They're designed to last season after season, providing excellent value for your investment.

**Trusted by world-class athletes:** Join the ranks of elite competitors who choose Tripoint for precision, durability, and unrivaled performance. When the best athletes in the world trust Tripoint, you know you're in good company.

**Lightweight Design:** We understand the importance of agility on the slopes. Tripoint Helmets are lightweight, so you won't feel weighed down, allowing you to tackle challenging terrain with ease.

**Style and Versatility:** Tripoint Helmets come in a variety of stylish designs and colors to suit your personal taste. Express your individuality while staying safe and comfortable on the slopes.

#### Hard shell construction

Hard shell construction – a tough outer shell combined with shock-absorbing foam for durable, reliable protection on the slopes.

#### In-mold construction

In-mold construction – a lightweight design where the outer shell is fused directly to the foam liner, delivering sleek comfort with high-impact protection.

#### Full Carbon & EPS

The Full Carbon FIS-certified race helmet combines advanced carbon fiber construction for lightweight durability and superior strength, meeting the highest safety standards. Its EPS inner material enhances impact protection, ensuring optimal performance and safety during high-speed racing.

#### Visor

The visor on a visor helmet is foldable up and down for easy adjustment. It features a soft rubber bottom with foam for added comfort, is changeable for convenience, and is anti-fog treated to maintain clear visibility.

#### Chin Guard Included

Supplied with removable Chin Guard in hard and durable ABS. It is foldable up and down for easy adjustment.

#### Chin Guard Ready

The Chin Guard Ready feature allows for easy attachment of a chin guard, providing extra protection during slalom activities and ensuring a secure, comfortable fit for added safety.

#### Strap holder

The strap holder provides a quick and secure way to keep your goggles firmly attached, offering convenience and reliability.

#### Integrated Ventilation

Integrated ventilation improves airflow, reducing heat and moisture buildup to keep you comfortable and maintain clear vision during intense activity.

#### Adapted goggle fit

Our goggles are engineered to perfectly align with our helmets, offering a snug, secure fit for enhanced comfort and performance.

#### Retention system – size adjustment

The helmet retention system offers easy adjustment of the helmet's size for a perfect fit, with both circumference and vertical adjustments for optimal comfort and stability.

#### Pure fit lining

The helmet features a removable ultra-cosy lining that can be washed, providing comfort and convenience while maintaining freshness and hygiene.

#### Reinforced Impact shields

The helmet is reinforced with EPP, designed to provide extra protection in critical areas. This innovative feature enhances safety by absorbing and distributing energy, ensuring superior protection during intense racing conditions.

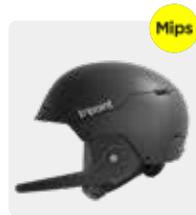

#### Emergency quick release

The Emergency Release Button allows for quick helmet removal in case of an accident. By simply pulling the rubber section, the ear pads detach, enabling fast and safe helmet removal without causing harm to the head or neck.

#### Quick strap

A helmet buckle mount – smooth, secure, and easy to open or close even with gloves on.

## 201 Trdkova Slalom

208 Trdkova Slalom Helmet - a perfect blend of durability, comfort, and advanced features for alpine enthusiasts. Crafted with a hard shell ABS outer and an inner core of EPS, this helmet ensures robust protection. The MIPS system adds an extra layer of safety by reducing rotational forces during impacts. The retention system allows for a perfect fit, ensuring a secure and comfortable feel.

Designed for Alpine slalom, the helmet comes with an adjustable chin guard, providing enhanced protection. The chin guard can be easily moved up and down to suit your preferences and is detachable if needed. Its aerodynamic design is optimized for high-speed performance, while the ventilation system keeps you cool during intense runs. The 208 Trdkova Slalom Helmet is your trusted companion for conquering the slopes with confidence and style.

## 206 Tromeja

Make the smart choice for your safety and performance on the slopes. Elevate your skiing experience with the 206 Tromeja Alpine Ski Helmet – where FIS certification meets the strength of full carbon shell construction. Get ready to conquer the mountain with confidence!

**FIS Certified for Pro-Level Performance:** Elevate your skiing game to the highest level with the 206 Tromeja helmet, proudly FIS certified. Trusted by professional athletes, it meets the stringent safety standards of the International Ski Federation, ensuring you're geared up for peak performance and protection.

**Full Carbon Shell for Uncompromising Strength:** Our helmet features a cutting-edge full carbon shell construction. This not only makes it incredibly lightweight but also exceptionally strong. You'll feel the difference as you confidently conquer challenging terrain.

### Mips

Safety is our top priority, which is why we have incorporated MIPS (Multi-directional Impact Protection System) technology into the design of the 206 Tromeja. MIPS is a revolutionary system that helps reduce rotational forces during impacts, minimizing the risk of brain injuries. With MIPS, you can have peace of mind knowing that you're equipped with the latest in helmet safety technology.

## 209 Arnoldstein

Arnoldstein back protector, inspired by the stunning alpine region where Austria, Slovenia, and Italy converge. Named after this iconic tri-point, Arnoldstein embodies the rugged beauty and dynamic terrain of the Alps—a paradise for skiing and other alpine adventures.

At its core, Arnoldstein features a D3O insert, recognized as the market's best back protection. Developed over many years, this advanced technology offers unparalleled performance, adapting to your movements while providing exceptional impact resistance.

Safety is paramount in these environments, and Arnoldstein ensures your spine is protected, helping you enjoy the slopes with confidence and peace of mind. Whether you're carving through fresh powder or tackling challenging terrain, this back protector combines cutting-edge safety and unmatched comfort. Elevate your alpine adventures with Arnoldstein—where innovation meets protection.

### Technical features

- Over 3.5x greater ventilation
- Reduced contact area on back for improved heat regulation
- Lightweight design
- Level 1 is certified to exceed performance requirements of EN 1621-2:2014 (Level 1), including optional cold [-10C], & UKCA standards
- Enhanced durability
- Greater Flexibility
- Made with biobased content, reducing CO2 footprint with no compromise on performance
- Retrofittable into D3O® Viper garments for easy integration
- Full back protector offering maximum coverage
- Available in 6 different sizes
- Suitable for snow sports
