GLASSES WITH A MISSION

We want to make accessible innovative sports glasses that respect the environment and protect your eyes throughout every moment of your life.

Design

We love fashion, we love simple, we love innovative design.

We also love fair prices. So that cycling, skiing and traveling while being well protected remain moments that we can all enjoy.

Curiosity

In 50 years, we want to be able to look back on the sports glasses industry and laugh. Knowing things have changed, and we have played a major role in the transformation.

Environment

Whether it's about choosing our materials or selecting our partners, our glasses are manufactured according to a very strict set of specifications to ensure our products are safe and long-lasting.

Ever since we were kids, we have taken the environment for granted. But then we grew up and realized that nothing will last forever. That is why we have a sustainability mindset in everything we do.

tripoint.com

THE BEGINNING

Embark on a journey with Tripoint, where passion for design and an unwavering commitment to empowering athletes converg.

Our journey began with a shared passion for design and an unwavering commitment to empower athletes in reaching their pinnacle of success. As a group of visionaries, we set out to merge style with substance, creating sports glasses that not only elevate your performance but also embody the essence of cutting-edge design.

Driven by the belief that athletes deserve more than just gear – they deserve an experience – we embarked on a mission to craft products that seamlessly blend functionality with flair. Our love for sports and the athletes who fuel our inspiration motivates us to push the boundaries of innovation, ensuring every pair of Tripoint sports glasses is a testament to our dedication.

But it's not just about the glasses; it's about the athletes who wear them. We're here to be more than just a brand; we're their dedicated partners in the pursuit of greatness. Our commitment extends beyond delivering top-notch products to providing an unparalleled level of service. Your goals are our goals, and together, we strive to conquer new heights.

WHAT DOES TRIPOINT STAND FOR?

The name Tripoint is a geographical point at which the boundaries of three countries or subnational entities meet. This creates a unique place and binds countries together.

Tripoints can be found all over the world. There are approximately 176 international tripoints. We are humble and respectful to these surroundings. Knowing they can hit us with full force. That is why we adapt, that is why we prepare, that is why Tripoint exists. Made to withstand the harsh and variable climate and ready to take on every challenge.

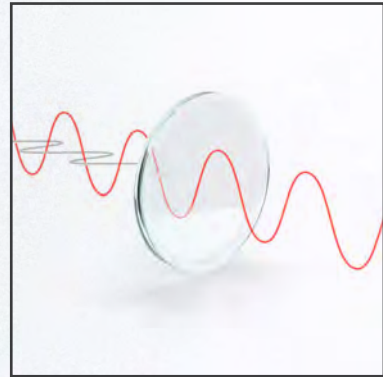

tripoint

TRI-X VISION
Lens boost technology

When the surroundings and the weather conditions are harsh and unpredictable. Or you want a lens that is perfectly adapted to your purpose. The Tri-X Vision lens technologies are here to help.

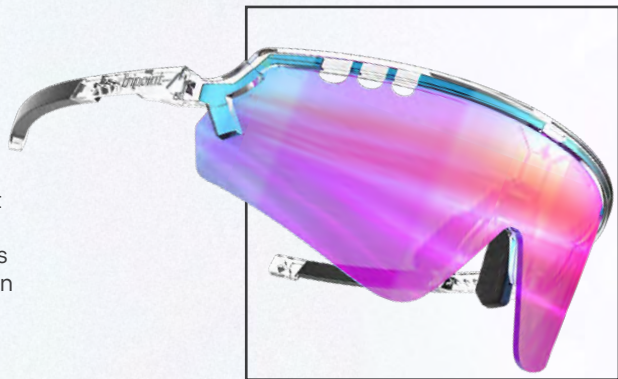

TRI-X | Polarized

The Tri-x polarized lens cuts out all reflecting light rays. No more glare from water, snow, wet roads or other reflecting materials.

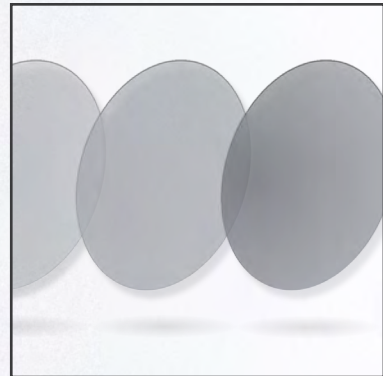

TRI-X | UltraVue

The Tri-x contrast lens are made to boost colors and contrast in low light conditions. The lens blocks all the fuzzy colors in the color spectra. This results in a sharp, clear vision even in low light.

TRI-X | Chromic

The Tri-x chromic lens are made to suit every weather condition. The lens changes its shading automatically and instantly from light to dark and back again based on the weather condition.

BI^o-BASED | Nylon lens

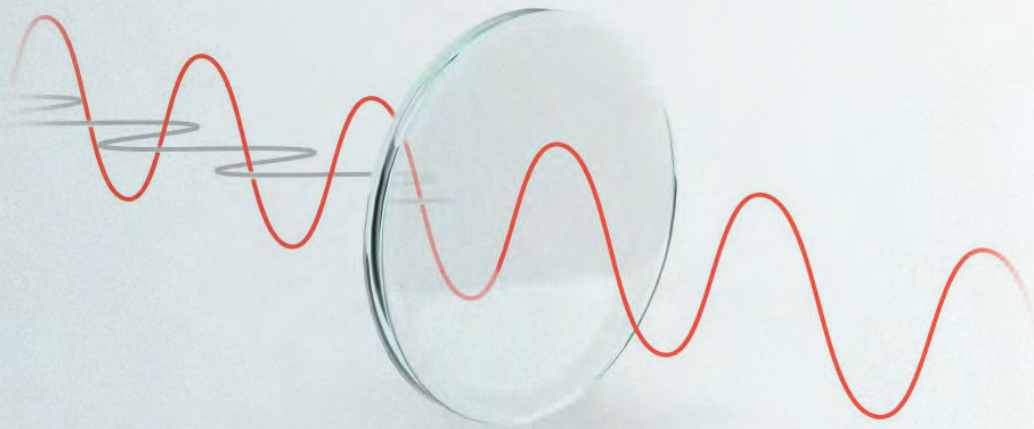

The Tri-x nylon lens offer the pleasure of a crisp clear vision. The comfort of ultralight weight. Safety in form of durability and shatter resistance.

Nylon as material are Bio-based and free from harmful BPA chemicals.

| Polarized

Tired of being blinded by harsh glare when you're out and about? It's time to see the world in all its glory without the annoying distractions. Say hello to the Tri-x Polarized Lens – the ultimate solution to eliminate reflections and enhance your visual experience!

Glare-Free Clarity:

Tri-x Polarized lenses are meticulously crafted to cut out all those pesky reflecting light rays. Whether it's blinding sunbeams on water, glistening snow, or slick, wet roads, our lenses ensure you see clearly without any distracting glare.

Uninterrupted Water Adventures:

Love spending time by the water but hate the glare bouncing off the surface? Tri-x Polarized is your perfect companion for fishing, boating, or simply soaking up the sun by the beach. Dive into crystal-clear vision, and don't let glare spoil your aquatic fun!

Safely Navigate Snowy Slopes:

Skiing or snowboarding on bright, sunny days?

Tri-x Polarized keeps your vision sharp without those blinding reflections on the slopes. Enjoy your winter adventures without squinting in the snow.

Safer Road Trips:

Road trips are a breeze with Tri-x Polarized. Say goodbye to the blinding headlights of oncoming cars and the shimmering glare on wet roads. Drive safely and comfortably, day or night.

True Colors Shine Through:

Our lenses not only eliminate glare but also reveal the true beauty of your surroundings. Experience vibrant colors, enhanced contrast, and a world filled with stunning detail.

Rediscover the world in all its glory with Tri-x Polarized. Don't let annoying reflections hinder your experiences – choose the lens that lets you see the world on your terms. Tri-x Polarized – where clarity meets style, and glare becomes a thing of the past!

Unobstructed vision with biobased nylon lenses

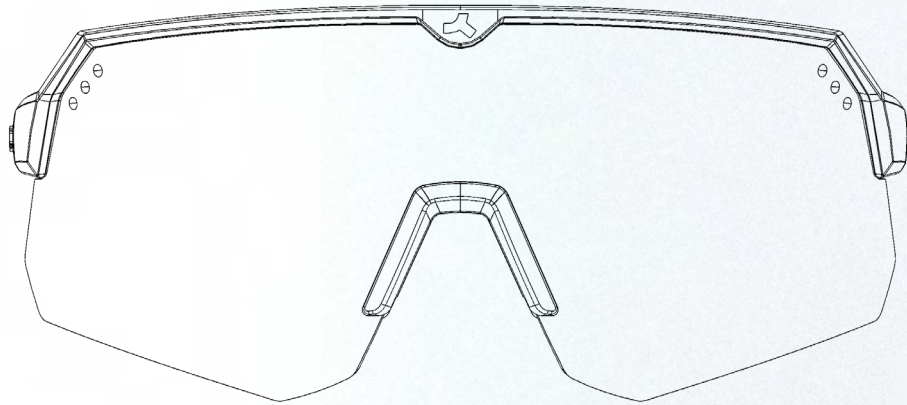

For maximal safety and top performance it is important that your glasses do not obstruct your vision and only enhance it. Tripoint comes with a biobased Nylon lens with extremely high optical quality. The Nylon lens is both lighter and provides a clearer view than Polycarbonate, which is the most common material for lenses in sports glasses. The lens is also flexible, resistant and has a good "memory". If you bump or bend them, they will return to their original shape. Nylon as a material is also free from BPA, which is a chemically harmful substance for the body. Not only does the lens provide better performance, but it also has less impact on the environment in the manufacturing process.

Tripoint also offers an endless amount of interchangeable lenses to maximize vision in the widest variety of different weather conditions. Tripoint complies with standards EN ISO 12312-1, AS/NZS 1067 & ANSI Z80.3.

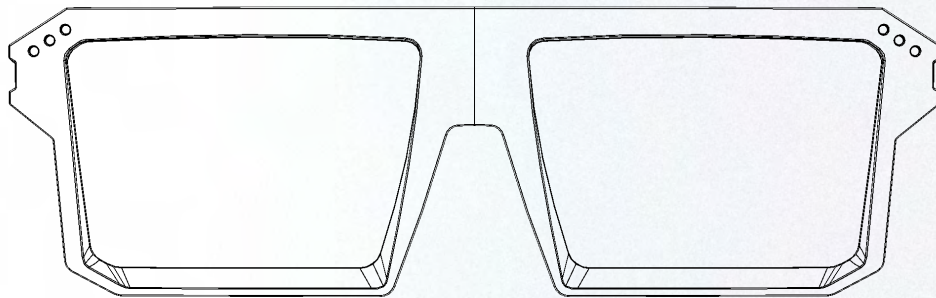

Light weight biobased nylon frame

The biobased frame is made of a strong lightweight Nylon material and puts minimal strain on the nose, ears and environment thanks to the low weight and biobased material. To ensure maximum mobility for the head and minimum tension in the neck, Tripoint sports glasses are superlight, they often weight less than 40g.

WHY TRIPOINT SPORTS GLASSES?

Biobased nylon frame: Tripoint Sports Glasses are meticulously engineered and crafted using top-tier bio-based materials, ensuring durability in the face of challenging conditions, lasting for seasons of intense sports activities.

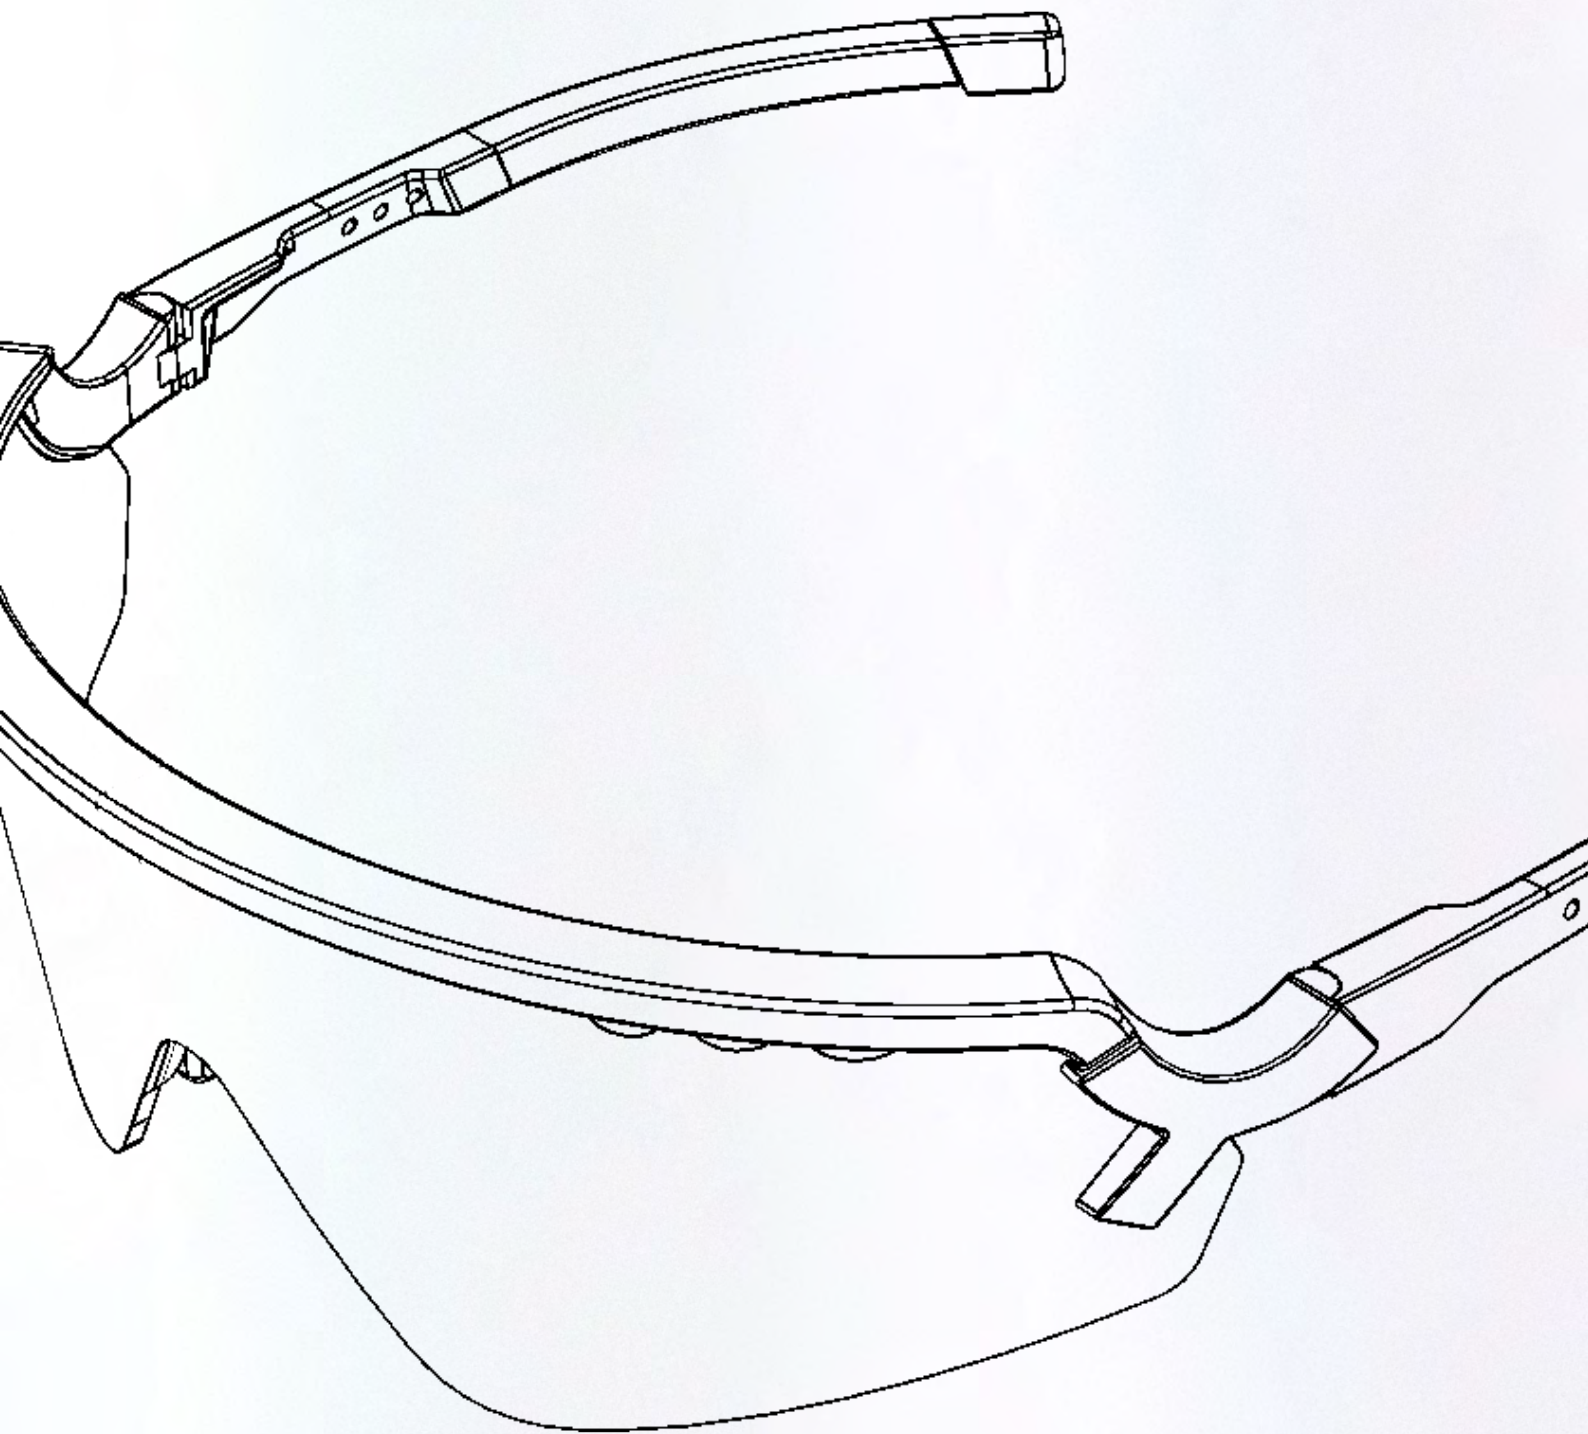

Optimal Visibility: These sports glasses deliver unparalleled visibility, thanks to cutting-edge lens technology that enhances clarity and minimizes glare with 100% UV-protection. Whether you're cycling, skiing, or participating in outdoor adventures, Tripoint Sports Glasses offer crystal-clear vision.

Customized Comfort: Tailored for comfort, Tripoint Sports Glasses are often adjustable in both nose (Tri-click nose system™) and temples (Tri-bend temple tips™) to securely fit any face shape. Their ergonomic design minimizes pressure points, allowing you to concentrate on your athletic pursuits without distraction.

Lightweight Design: Recognizing the need for agility in sports, Tripoint Sports Glasses boast a lightweight design. Say goodbye to the burden of heavy eyewear, empowering you to navigate challenging terrain effortlessly and focus on your athletic pursuits with unmatched ease.

Trusted by world-class athletes: Join the ranks of elite competitors who choose Tripoint for precision, durability, and unrivaled performance. When the best athletes in the world trust Tripoint, you know you're in good company.

001 Treriksörset

Tech & Soul

BIO-
BASED

Description

30 years of experience in the sport and fashion eyewear industry has led us to this style - 001 Treriksörset. Treriksörset is the ideal model for speed sports such as mountain biking, road biking or skiing. But still just as stylish to be able to fit on a catwalk. A sober and pure design, combining style and technicality: Its wrap-around lens offers optimal protection against the wind generated by speed, but also against branches that you may encounter on your way.

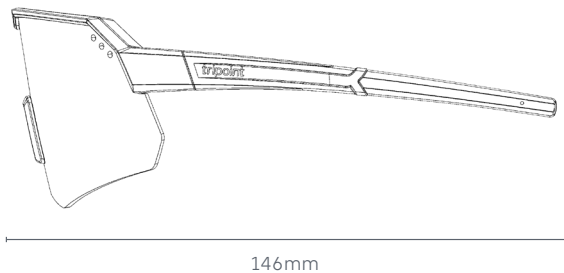

Enjoy increased peripheral vision and clarity with the biobased Nylon lens, an essential factor in improving your visual accuracy and therefore, your sporting performance! Its 100% UV protective lens will counteract tired eyes for many years to come.

A durable model designed to last: 001 Treriksörset is made of 45% organic polyamide sourced from castor oil, carefully selected for its lightness, flexibility and resistance to shocks.

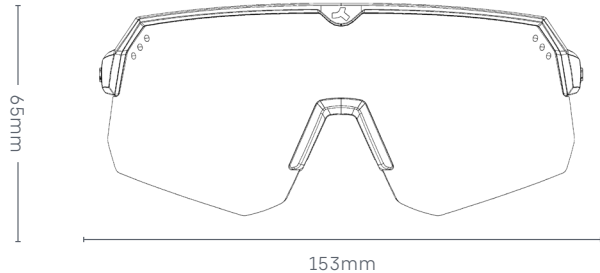

Keep your 001 Treriksörset in top condition: the storage pouch is specially designed to keep your shades safe. And the cleaning wipe keeps the dirt away, for permanent visual comfort.

Standards

This model meets the standards EN ISO 12312-1, AS/NZS 1067 & ANSI Z80.3 for sunglasses.

153mm

Technical Features

Tri-click nose System

The unique system makes the nose part easy to adjust and maintains the shape that the user himself specified. The nose part is rubber-coated and provides the user with comfort during longer and tougher forms of activity.

Tri-bend temple tips

The rubberized temple tips are adaptable and easy to adjust to your head for a stable and comfortable use for extended periods.

Tri-field wrap-around

The wrap-around frame provides a wide field of vision and enhanced peripheral eyesight to ensure optimal visual accuracy and improve your sports performance.

Biobased Nylon frame

The frame is made of 45% organic sourced polyamide with castor oil. The nylon material is both strong and light weighted. The Frame puts minimal strain on the nose, ears and environment at the same time.

Biobased Nylon lens

The Biobased Nylon lens is both lighter and provides a clearer view than Polycarbonate, which is the most common material for lenses in sports glasses. The lens is flexible, resistant and has a good "memory". If you bump or bend them, they will return to their original shape. Nylon as a material is also free from BPA which is a chemically harmful substance for the body.

Hydrophobic/Oleophobic

Our top of the line Hydrophobic + Oleophobic treatment ensures water, oil and dirt pearl off your lenses.

Tri-dot ventilation

The right amount of air ventilation can be important to keep the fog away. Our tri-dots provide the user with enough air circulation for a fog-free experience.

100% UV400 Protection

Our lenses block all harmful UVA, UVB & UVC light rays with wavelengths up to 400 nanometers – regardless of sun or cloud conditions.

Interchangeable lens

The weather conditions can suddenly change, then it might be handy to have a spare lens ready. On this frame, you can easily change from one lens to a lens that is best suited for the moment. Spare lenses are available for purchase.

Optical insert (available as an accessory)

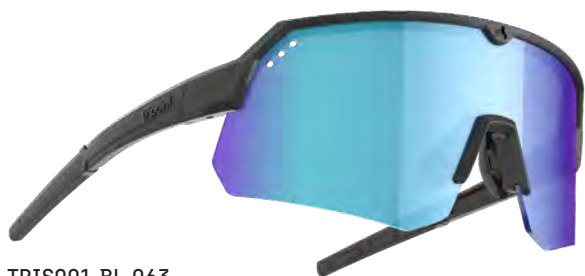

RX-able optical insert which can be taken to an optician and fitted with your own prescription lenses.

Click hinge

High quality click hinge for a long-lasting temple. Free from squeaking sound, loose screws and unexpected folding.

006 1°0'S 33°55'E Lake Victoria Small

Tech & Soul

BIO-
BASED

Description

Elevate your performance and style with the 006 Lake Victoria small sports glasses.

Experience the pinnacle of sports eyewear innovation with the 006 Lake Victoria small model. Crafted to excel in speed sports like mountain biking, road biking, and skiing, it seamlessly merges function and fashion. environment.

Its refined design effortlessly marries form and function. The wrap-around lens provides unparalleled protection against wind and obstacles, offering a blend of elegance and performance.

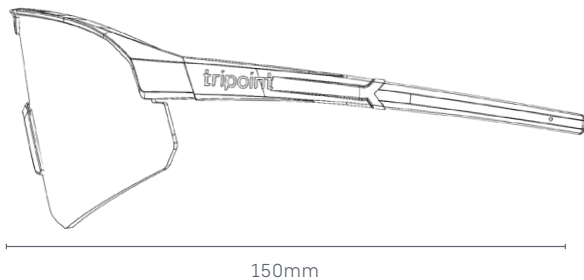

The wide polycarbonate lens provide peripheral vision, clarity and high impact resistance. Equipped with a 100% UV protective lens, Lake Victoria

safeguards against tired eyes and the effects of harmful rays.

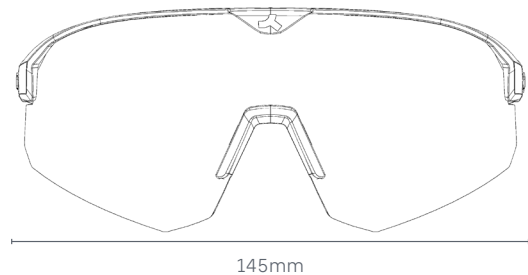

006 Lake Victoria is designed to withstand the test of time, the frame is made from 45% organic polyamide sourced from castor oil. This ensures lightweight flexibility, while its shock resistance guarantees longevity.

Keep your 006 Lake Victoria small sports glasses in mint condition with the tailored storage pouch. The included cleaning wipe ensures lasting visual comfort by keeping dirt at bay.

Standards
This model meets the standards EN ISO 12312-1, AS/NZS 1067 & ANSI Z80.3 for sunglasses.

60mm

145mm

Technical Features

Tri-click nose System

The unique system makes the nose part easy to adjust and maintains the shape that the user himself specified. The nose part is rubber-coated and provides the user with comfort during longer and tougher forms of activity.

Tri-Bend Temple Tips

The rubberized temple tips are adaptable and easy to adjust to your head for a stable and comfortable use for extended periods.

Tri-field wrap-around

The wrap-around frame provides a wide field of vision and enhanced peripheral eyesight to ensure optimal visual accuracy and improve your sports performance.

Biobased Nylon frame

The frame is made of 45% organic sourced polyamide with castor oil. The nylon material are both strong and light weighted. The Frame puts minimal strain on the nose, ears and environment at the same time.

Polycarbonate lens

The lens in Polycarbonate has high impact resistance and a good optical quality for clear and crisp vision.

Interchangeable lens

The weather conditions can suddenly change, then it might be handy to have a spare lens ready. On this frame, you can easily change from one lens to a lens that is best suited for the moment. Spare lenses are available for purchase.

Hydrophobic/Oleophobic

Our top of the line Hydrophobic + Oleophobic treatment ensures water, oil and dirt peel off your lenses.

100% UV400 Protection

Our lenses block all harmful UVA, UVB & UVC light rays with wavelengths up to 400 nanometers – regardless of sun or cloud conditions.

Click hinge

High quality click hinge for a long-lasting temple. Free from squeaking sound, loose screws and unexpected folding.

007 17°47'16"S 25°15'24"E Chobe

Tech & Soul

BIO-
BASED

Description

Elevate your performance and step up your style game with the remarkable 007 Chobe sports glasses. These versatile frames are carefully engineered to cater to your every multisport need. The high basecurve design ensures a snug fit against your face, making them the perfect choice for both gusty winds and radiant sunshine.

Crafted to excel in high-speed sports such as mountain biking, road biking, surfing and skiing, it effortlessly blends fashion with function.

Its sleek design seamlessly marries aesthetics and practicality. The wrap-around lens offers unmatched protection against wind and obstacles, marrying elegance with top-tier performance. It's like having a second skin glued to your face.

The wide polycarbonate lens delivers exceptional peripheral vision, crystal-clear clarity, and remarkable high-im-

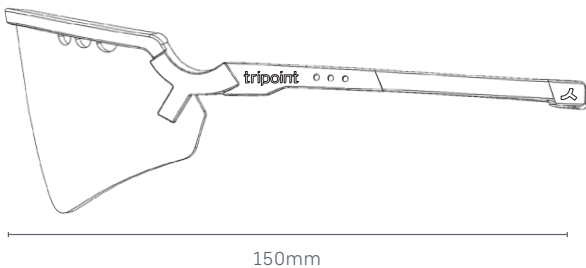

pact resistance. Equipped with a 100% UV protective lens, the 007 Chobe safeguards your eyes against fatigue and the harmful effects of UV rays.

Designed for longevity, the 007 Chobe frame is constructed from 45% organic polyamide sourced from castor oil. This ensures lightweight flexibility, while its shock resistance guarantees lasting durability.

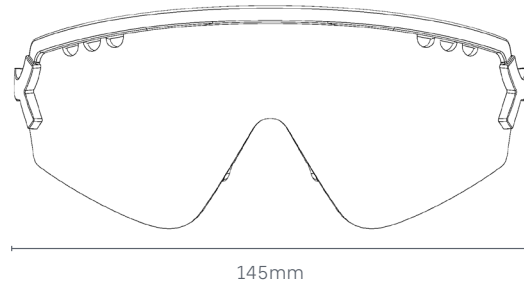

To maintain the pristine condition of your 008 Lake Prespa sports glasses, we offer a customized storage pouch that doubles as a cleaning cloth. Additionally, you'll receive a hard case with a magnetic lock, and it can be flat-packed for convenience.

Standards

This model meets the standards EN ISO 12312-1, AS/NZS 1067 & ANSI Z80.3 for sunglasses.

101 Shiceng Dashan

Life & Globe

BI^o-
BASED

Description

Our snow goggle 001 Shiceng Dashan have been designed for all the mountain lovers and enthusiasts in mind.

Comfort, protection and practicality guaranteed: The soft and comfortable 3-layers of foam will perfectly fit the contours of your face, while the anti-slip silicone strap hold on to your helmet to ensure a safe and comfortable ride down the slopes.

The sealed double lens is anti-fog treated between the two lenses to ensure your visual comfort and clarity.

001 Shiceng Dashan is OTG-prepared and can be worn over corrective glasses and fits most of the helmets on the market.

Keep your 001 Shiceng Dashan in top condition: the storage pouch is specially designed to also act as a cleaning wipe, for permanent visual comfort.

Standards

This model complies with international standards relating to eye protection for skiing and similar activities such as snowboarding (NF EN 174).

Technical Features

Built in anti-fog shield

The goggles are by nature anti-fog resistant and prevent condensation thanks to their sealed dual-material lens (polycarbonate on the outside and acetate on the inside).

Double buckle size adjustment

The goggles are equipped with a double buckle size adjustment to ensure optimum support and easy adjustment that last.

Tri-Field Vision

The wrap-around frame provides a wide field of view and enhanced peripheral vision to ensure optimal reflexes and improve your sports performance.

Tri-dot ventilation

The right amount of air ventilation can be important to keep the fog away. Our tri-dots provide the user with enough air circulation for a fog-free experience.

100% UV400 Protection

Our lenses block all harmful UVA, UVB & UVC light rays with wavelengths up to 400 nanometers – regardless of sun or cloud conditions.

OTG-prepared

This style has a cut out in the frame and can be worn over corrective glasses

Interchangeable lens

The weather conditions can suddenly change, then it might be handy to have a spare lens ready. On this frame, you can easily change from one lens to a lens that is best suited for the moment. Spare lenses are available for purchase.

Anti-slip silicone strap

A thin line of silicone is attached to the inside of the strap and creates friction to your helmet. This prevents the goggles from falling off and ensure a safe and comfortable ride down the slopes.

102 Nafkopf

Tech & Soul

BIO-
BASED

Description

Our snow goggle 002 Nafkopf is developed with several years of experience from the Alpine World Cup circus. Nothing is left to chance, every millimeter on the frame is carefully evaluated to give the user the absolute best conditions for success. You get an extraordinary field of vision thanks to the wide cylindrical lens and the precision-fitted frame. If your about to go in really high speeds, you can also buy an air blocker that blocks air flow around the entire frame. Even though it is a frame designed for the professional athlete, it of course works just as well for the exerciser.

Comfort, protection and practicality guaranteed: The soft and comfortable 3-layers of foam will perfectly fit the contours of your face, while the anti-slip silicone strap hold on to your helmet to ensure a safe and comfortable ride down the slopes.

The sealed double lens is anti-fog treated between the two lenses to ensure your visual comfort and clarity.

102 Nafkopf is OTG-prepared and can be worn over corrective glasses and fits most of the helmets on the market.

Keep your goggles in top condition: the storage pouch is specially designed to also act as a cleaning wipe, for permanent visual comfort.

Standards

This model complies with international standards relating to eye protection for skiing and similar activities such as snowboarding [NF EN 174].

Technical Features

Built in anti-fog shield

The goggles are by nature anti-fog resistant and prevent condensation thanks to their sealed dual-material lens [polycarbonate on the outside and acetate on the inside].

103 Zapaleri

Free & Strong

BIO-BASED

Description

103 Zapaleri pays homage to the glory days of the past in a new vintage style. Simple, efficient and brutally stylish. Although the similarities with former days are striking, the technical features are at the forefront in terms of function and technicality.

Comfort, protection and practicality guaranteed: The soft and comfortable 3-layers of foam will perfectly fit the contours of your face, while the anti-slip 30mm silicone strap hold on to your helmet to ensure a safe and comfortable ride down the slopes.

The sealed double lens is anti-fog treated between the two lenses to ensure your visual comfort and clarity.

103 Zapaleri is OTG-prepared and can be worn over corrective glasses and fits most of the helmets on the market.

A durable model designed to last: 103 Zapaleri is made of 45% organic polyamide sourced from castor oil, carefully selected for its lightness, flexibility and resistance to shocks and perspiration.

Keep your goggles in top condition: the storage pouch is specially designed to also act as a cleaning wipe, for permanent visual comfort.

Standards

This model complies with international standards relating to eye protection for skiing and similar activities such as snowboarding (NF EN 174).

Technical Features

1°23'S 29°36'E Small 110 Tumba Peak

Life & Globe

Description

Introducing the 109 Tumba Peak small, a pair of small size ski goggles designed to provide an expansive field of view.

The ventilated frame ensures optimal airflow, complemented by a triple-layer foam construction for a comfortable fit against the face.

Equipped with a silicone strap for excellent friction with the helmet, the goggles feature a ventilated frame and a sealed double lens with anti-fog treatment. The lens is also interchangeable, offering versatility for varying conditions.

With OTG (Over the Glasses) prepared design and a double buckle size adjustment, the 110 Tumba Peak Small prioritizes both performance and comfort for your skiing adventures.

Keep your goggles in top condition: the goggle soc is specially designed to also act as a cleaning wipe, for permanent visual comfort.

Standards

This model complies with international standards relating to eye protection for skiing and similar activities such as snowboarding (NF EN 174).

Technical Features

Built in anti-fog shield

The goggles are by nature anti-fog resistant and prevent condensation thanks to their sealed dual-material lens (polycarbonate on the outside and acetate on the inside).

Double buckle size adjustment

The goggles are equipped with a double buckle size adjustment to ensure optimum support and easy adjustment that last.

Tri-Field Vision

The wrap-around frame provides a wide field of view and enhanced peripheral vision to ensure optimal reflexes and improve your sports performance.

100% UV400 Protection

Our lenses block all harmful UVA, UVB & UVC light rays with wavelengths up to 400 nanometers – regardless of sun or cloud conditions.

OTG-prepared

This style has a cut out in the frame and can be worn over corrective glasses

Interchangeable lens

The weather conditions can suddenly change, then it might be handy to have a spare lens ready. On this frame, you can easily change from one lens to a lens that is best suited for the moment. Spare lenses are available for purchase.

WHY TRIPPOINT SKI HELMETS?

Selecting a Tripoint Ski Helmet isn't just a choice; it's a commitment to your safety, comfort, and performance on the slopes. Here's why choosing a Tripoint Ski Helmet is a wise decision:

Safety First: Tripoint Ski Helmets are engineered with cutting-edge technology to provide maximum protection. They meet or exceed safety standards, ensuring your head is safeguarded in the event of a fall or collision. Your well-being is our top priority.

Comfortable Fit: Tripoint Ski Helmets are designed for a snug, comfortable fit. They come with adjustable straps and sizing options to ensure your helmet fits securely, eliminating distractions while you conquer the mountain.

Ventilation: Tripoint Helmets feature advanced ventilation systems to regulate temperature and prevent overheating. Stay cool and focused during intense runs while maintaining optimal warmth in colder conditions.

Durability: Crafted from high-quality materials, Tripoint Ski Helmets are built to withstand the rigors of skiing and snowboarding. They're designed to last season after season, providing excellent value for your investment.

Trusted by world-class athletes: Join the ranks of elite competitors who choose Tripoint for precision, durability, and unrivaled performance. When the best athletes in the world trust Tripoint, you know you're in good company.

Lightweight Design: We understand the importance of agility on the slopes. Tripoint Helmets are lightweight, so you won't feel weighed down, allowing you to tackle challenging terrain with ease.

Style and Versatility: Tripoint Helmets come in a variety of stylish designs and colors to suit your personal taste. Express your individuality while staying safe and comfortable on the slopes.
